Forecast for Tuesday 23 Jul 2024

Weather: Cloudy with the chance of heavy showers around midnight, then drier but still damp at times to end the night. Gradually brightening up through the morning with the cloud breaking at times to give occasional sunny intervals, these perhaps more numerous during the afternoon. An often sunny evening to come.

Chance of cloud-free hill tops above 600m: 60% east and 30% west during the morning. Becoming 90% through the afternoon.

Low cloud and visibility: Periods of cloud above 400-500m during the morning, this mostly in the west but ragged scraps of cloud above 500m possible in the east too. Cloud lifting to patches above 700-800m during the afternoon. Largely very good visibility but locally poor or very poor in the cloud.

Meteorologist's View

Poor visibility at first may cause some navigational challenges, but brightening up with sunny spells during the afternoon. High UV levels so plenty of sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 22 Jul 2024	2.2mm	4.8mm	5.8mm

Forecast for Wednesday 24 Jul 2024

Weather: A cloudier day overall but still bright with sunny spells these most prolonged during the morning. Any sunshine turning hazy through the afternoon with thicker cloud and perhaps some light drizzly rain by midnight.

Maximum wind: Southwesterly 5-10 mph increasing to 20-25 mph by the end of the day.

Chance of cloud-free hill tops above 600m: 60% becoming 90% falling to 30% from dusk.

Low cloud and visibility: Patches of cloud above 700m first thing then more general cloud above 600-700m from dusk. Largely very good visibility but locally poor or very poor in the cloud.

Temperature: **Valleys:** Plus 11 Celsius rising to plus 20 Celsius.
At 600m: Plus 11 Celsius rising to plus 15 Celsius.
Freezing level: Well above the summits.
